## Controlled Substance Schedules

### Disclaimer

Section 812 of the Controlled Substances Act ([21 U.S.C. §801](#) et seq.) (CSA) lists substances which were controlled in 1970 when the law was enacted. Since then, approximately 160 substances have been added, removed, or transferred from one schedule to another. The current official list of controlled substances can be found in [section 1308](#) of the most recent issue of [Title 21 Code of Federal Regulations \(CFR\) Part 1300](#) to end ([21 CFR §1308](#)) and the final rules which were published in the Federal Register subsequent to the issuance of the CFR.

This list describes the basic or parent chemical and do not describe the salts, isomers and salts of isomers, esters, ethers and derivatives which may be controlled substances. **These lists are intended as general references and are not comprehensive listings of all controlled substances.** Please note that a substance need not be listed as a controlled substance to be treated as a Schedule I substance for criminal prosecution. A controlled substance analogue is a substance which is intended for human consumption and is structurally or pharmacologically substantially similar to or is represented as being similar to a Schedule I or Schedule II substance and is not an approved medication in the United States. ([See 21 U.S.C. §802\(32\)\(A\)](#) for the definition of a controlled substance analogue and [21 U.S.C. §813](#) for the schedule.)

***This document is a general reference and not a comprehensive list. This list describes the basic or parent chemical and does not describe the salts, isomers and salts of isomers, esters, ethers and derivatives which may also be controlled substances.***
